SUMMARY

Driven Computer Science & Engineering student specializing in Game Development, technical art pipelines, and high-performance systems engineering. Proven track record of developing optimized, interactive 3D virtual environments using C# and Unity. Adept at managing asset optimization workflows in Blender (O Grade) and production-ready UI/UX prototyping in Figma. Combines deep game engineering foundations with full-stack JavaScript/TypeScript paradigms to architect real-time network backends and cloud-integrated data flows.

TECHNICAL SKILLS

- **Game Development & Core Engineering:** C++, C#, Unity Engine, Object-Oriented Programming (OOP), 3D Vector Math, Game Loop Optimization, Memory Management, Data Structures & Algorithms (DSA).
- **Technical Art & Design UI/UX:** Blender (Advanced - O Grade Performance), Figma (Interactive Gameplay Interface Wireframing & State Flows).
- **Full-Stack Systems & Cloud Infrastructure:** Node.js, React.js, Express.js, WebSockets, HTML5, CSS3, Tailwind CSS, RESTful APIs, PostgreSQL, MongoDB, Git/GitHub.

CORE GAME DEVELOPMENT & TECHNICAL ART PROJECTS

HOLLOW LOOP | 3D Psychological Horror Game (C# / Unity)

[GitHub Repository](#)

Lead Gameplay Systems Programmer

- Engineered a fully playable 3D psychological horror game utilizing event-driven gameplay scripts and dynamic environment state trackers.
- Architected highly reusable, modular object sub-systems managing structural player mechanics, absolute checkpoint saving, item inventories, and smooth scene progression.
- Applied comprehensive Object-Oriented Programming (OOP) architectures and design patterns to secure maximum codebase maintainability.
- Optimized spatial mesh rendering queues, runtime engine asset loading, and computational script loops to establish smooth performance markers.

Stylized Isometric Environment Animation (3D Technical Art / Blender)

[Watch Animation Video](#)

3D Environment & Light Pipeline Artist

- Drafted, modeled, and animated an atmospheric cyber-noir isometric environment utilizing complex lighting nodes and emissive material property tables.
- Implemented rigid low-poly meshes, explicit keyframe animations, and camera sequences satisfying an “O Grade” technical execution standard.
- Designed clean, layout-optimized 3D assets constructed specifically for unhindered viewport performance when deployed within external engine levels.

FULL-STACK & SYSTEMS ARCHITECTURE PROJECTS

React Web OS & Secure Inter-Process Communication System

[GitHub Repository](#)

Full-Stack Engineering Intern

- Engineered an interactive browser-simulated environment using React.js, Tailwind CSS, and Vite to execute fluid UI scaling and granular client-side state adjustments.
- Created a bidirectional communications infrastructure featuring Node.js and WebSockets handling high-frequency packet transmission and server synchronization.
- Debugged micro-latency events, concurrency blockers, and real-time state mutations during production cycle stress-testing.

TECHNICAL CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle University [\[View Certificate\]](#)
- **Oracle Data Platform 2025 Certified Foundations Associate** – Oracle University [\[View Certificate\]](#)
- **User Experience (UX) Design Principles Certification** – IIT Roorkee [\[View Certificate\]](#)
- **Data Structures & Algorithms Engineering Certification** – Cipher Schools [\[View Certificate\]](#)

PROFESSIONAL EXPERIENCE

Cipher Schools
Software Engineering Intern

June 2025 – Aug 2025
[\[View Internship Certificate\]](#)

- Implemented scalable production-grade algorithm trees and audited team code review processes using standard Git/GitHub collaborative workflows.

LEADERSHIP & VOLUNTEER EXPERIENCE

Local Community Support Center
Volunteer Chemistry Instructor (11th & 12th Grade)

June 2024 – July 2024
[\[View Recognition\]](#)

- Developed and delivered targeted Chemistry lessons to senior high school students at a local orphanage, breaking down complex foundational concepts and equations.
- Designed custom learning frameworks to spark scientific curiosity, improve retention rates, and build academic confidence in an underprivileged demographic.

EDUCATION

Lovely Professional University
Bachelor of Technology in Computer Science and Engineering

Aug 2023 – Present

- Core Coursework: Data Structures & Algorithms, Database Management Systems, Advanced Systems Engineering.
